

CBR and Program Science in HIV

Assess, contextualize, intervene, scale up and repeat

In this flipped competitive workshop, valuable time is devoted to forging relationships and understanding content either individually or in groups. It has a problem solving focus and is competitive in that it requires that a team (2 or more) remain engaged in all stages.

Step 1. Launching the Workshop.

1. To participate, watch the [Program Science 101 Module](#).
2. Watch a selection of UWW CBR Modules and [OHTN Program Science videos](#).
3. This is a problem solving competition, a number of teams will be rewarded with travel and meeting funds to put their solutions into practice.

Step 2. Building your team.

1. Form your team and identify which problem/goal/idea you will focus on.
2. Who can participate? Teams must be composed of at least one ASO staff and/or community partner, and at least one academic partner (researcher/graduate student/professor, ect.)

Step 3. Describing the project.

1. Record a [three-minute thesis \(3MT\)](#) video describing one programmatic problem/idea/goal, plus a 100-word summary.
2. Using a Program Science and/or CBR lens, describe the problem/idea/goal and the resources and methodologies you will need to approach it.

Step 4. Socializing the Idea.

1. At this stage, we will host public conversations to discuss significant aspects of your problem/idea/goal with our online audience.
2. Members of our review committee will contribute to these conversations. They will consider these conversations in their final scoring.

Step 5. Selecting Finalists.

1. A **review committee** is comprised of PHAS, academics, graduate and clinical students and frontline staff.
2. Will score the 3MT videos, public consultation participation and other steps taken by the team based on:
 - Clear exposition of key aspects of the problem/idea/goal
 - Number of viewers and viewers comments on YouTube
 - How the problem/idea/goal will be approached using CBR/Program Science
 - Clear references to the resources offered and/or additional resources/videos/ readings
 - Suggested strategies for engaging stakeholders
 - Suggested dissemination strategy (KTE/education)

Step 6. Getting Together to do the Work.

1. Teams are funded to meet at their home site. For example, ASO.
2. To receive funding, teams must submit a report outlining their: background, goals, methods, activities and budget.
